

Glorious Garden Gazpacho with Corn Relish

By Erin Fletter

Prep Time 20 / Cook Time / Serves 4 - 6

Fun-Da-Mentals Kitchen Skills

blend: to stir together two or more ingredients until just combined; blending is a gentler process than mixing.

chill: to cool, not freeze, food or drink by putting it on ice or in a refrigerator.

chop: to cut something into small, rough pieces using a blade.

soak: to immerse a hard food for a certain amount of time in a liquid to soften it.

tear: to pull or rip apart a food, like basil leaves, into pieces instead of cutting with a knife; cutting breaks cell walls more, so herbs can discolor faster.

toss: to lightly lift and drop food items together or coat food items with flour, or a sauce or dressing, as in a salad.

Equipment

- Blender (or bowl + immersion blender)
- Large mixing bowl
- Liquid measuring cup
- Dry measuring cups
- Measuring spoons
- Wooden spoon
- Cutting board
- Kid-safe knife
- Medium bowl

Ingredients

Glorious Garden Gazpacho with Corn Relish

- Gazpacho:
- 2 slices white bread or 1/4 baguette **** (for GLUTEN ALLERGY sub gluten-free/nut-free bread)****
- 1/2 C extra virgin olive oil
- 1 T vinegar
- 6 to 8 ripe tomatoes, any type will be wonderful **** (for NIGHTSHADE ALLERGY sub 3 to 4 C chopped cucumbers or honeydew melon)****
- 1 cucumber
- 1 small onion slice
- 1 garlic clove
- 2 tsp sugar
- 3 tsp salt
- Corn relish:
- 2 cucumbers
- 1 C fresh or frozen corn
- 1 avocado
- 2 T fresh tarragon leaves, torn
- 1 pinch salt
- 1 drizzle extra virgin olive oil

Food Allergen Substitutions

Glorious Garden Gazpacho with Corn Relish

Gluten/Wheat: Substitute gluten-free/nut-free bread.

Nightshade: For 6 to 8 tomatoes, substitute 3 to 4 C chopped cucumbers or honeydew melon.

Instructions

Glorious Garden Gazpacho with Corn Relish

intro

Gazpacho (gahs-PAH-choh) is a delicious, cold, tomato-based raw vegetable soup! This yummy soup originated in southern Spain. Gazpacho remained popular with farmers as a way to cool off during the summer and as a simple way to make a cool, easily eaten lunch with locally available ingredients such as fresh vegetables, olive oil, and bread.

tear + soak

Tear **2 bread slices** or **1/4 baguette** into pieces and add to a large bowl. Measure **1/2 cup olive oil** and **1 tablespoon vinegar** and add them to the bowl so that the bread starts to soak up the liquid.

chop + season

Have kids chop **6 to 8 ripe tomatoes**, **1 cucumber**, and **1 small onion slice** and add them to the bowl with the bread. Peel and mince **1 garlic clove** and add it to the bowl. Season with **2 teaspoons sugar** and **3 teaspoons sea salt**.

blend + chill

Pour the bread and tomato mixture into a blender (or leave in the bowl for use with an immersion blender) and blend at high speed until thick and creamy. Taste the gazpacho and add more salt or sugar to taste. Put in the fridge and let chill for at least 1 hour or up to 24 hours.

chop + toss

Next, make the corn relish. Have kids chop **2 cucumbers** and the flesh of **1 avocado**, tear **2 tablespoons of tarragon leaves**, and add them to a medium bowl. Add **1 cup of sweet corn**. Toss together with **1 drizzle of olive oil** and **1 pinch of salt**. Serve on top of the gazpacho. Enjoy with **Cheesy Herb Torta (Flatbread)** or store-bought flatbread. ¡Buen provecho!

Featured Ingredient: Tomato!

Hi! I'm Tomato!

"I'm a beautiful, juicy red Tomato. Do you pronounce my name: "tuh-may-tow" or "tuh-mah-tow?" Either way you slice it (or say it), we tomatoes are wonderfully adaptable. You'll find us fresh or cooked on sandwiches, in salads, tacos, soups, stews, sauces, and much more."

History & Etymology

The tomatoes we have now descended from the pea-size fruit of wild plants that grew in western South America. Mesoamericans were the first to domesticate the tomato plant sometime before 500 BCE. Hernán Cortés, a Spanish conquistador, may have brought tomatoes back to Europe in the 16th century after conquering the Aztec city, Tenochtitlan (now Mexico City).

Tomatoes cultivated in North American colonies in the early 1700s may have been introduced from the Caribbean. Thomas Jefferson also brought tomato seeds back from France. Before tomatoes were used in cooking, the plants were used ornamentally due to some people's beliefs that they were poisonous. One reason for this error was that tomatoes come from the nightshade family, including the belladonna plant (or deadly nightshade), which has highly toxic leaves and berries. Another reason may be that the pewter plates they used back then adversely reacted to the acid in tomato juice.

China is by far the largest producer of tomatoes in the world. In the United States, California and Florida produce the most tomatoes.

The American and British pronunciations of "tomato" were made famous by an Ira and George Gershwin song from 1937 called "Let's Call the Whole Thing Off." Americans pronounce the word "tuh-may-tow," and the British say "tuh-mah-tow."

The word "tomato" comes from the Spanish, French, or Portuguese "tomate," from the Nahuatl "tomatl."

Anatomy

The tomato is a berry from the tomato plant (*Solanum Lycopersicum*), a perennial vine. It is part of the Solanaceae family, like the potato, pepper, eggplant, and petunia. Since it is a berry, it is a fruit, although mainly used as a vegetable.

A tomato's color is usually red but can also be yellow, orange, green, or purple. Tomatoes can be spherical, oval, or pear-shaped. Their flesh is pulpy with cavities, called locules, that hold the seeds.

There are more than 10,000 tomato varieties. Some are hybrids, and some are heirlooms. An heirloom tomato is a variety that has been grown for generations on a family farm rather than commercially.

Unfortunately, in the past 40 years, many heirloom varieties have been lost, along with the smaller family farms that grew them. However, hundreds of heirloom tomato varieties are still available.

How to Pick, Buy, & Eat

If you are growing your own tomatoes, pick them from the vine while still firm, with a slight give, and before their ripe color (usually red) deepens too much. While holding the fruit, twist it off the stem until it snaps off. The leaf on top of the tomato (the calyx) and part of the stem will come with it. You can also snip it off using garden scissors.

When you choose tomatoes at the store, pick fruit that has smooth, brightly colored skin with no cracks or bruises, is firm but gives with slight pressure, is heavy for its size, and has a pleasant, aromatic smell. Avoid tomatoes with pale or dark spots.

Store tomatoes at room temperature, as their flavor will decrease in a refrigerator's cold temperature. Wait to wash them until you are ready to use them.

If you plan to make a tomato sauce or soup using fresh, raw tomatoes, you will want to peel them first. This can be difficult without some preparation: First, put a pot of water on the stove to boil and fill a large bowl with cold or icy water. Next, after washing the tomatoes, use your knife to cut a shallow 'X' through

the skin at the top or bottom of each one. Then use a slotted spoon to place the tomatoes into the boiling water until the skin begins to loosen and peel back at the incision, about 30 to 60 seconds. Finally, immediately dunk them into the ice water. The skin should peel easily now. You can also remove the seeds by cutting the peeled tomatoes in half and scooping the seeds out with a spoon.

Tomatoes are versatile vegetables for cooking. Ripe tomatoes can be prepared fresh, stuffed, baked, boiled, or stewed, and they are the base for many sauces. You can also pickle green, unripe tomatoes, add them to salsa or bread and fry them.

Nutrition

Tomatoes are a moderate source of vitamin C, and cooked tomatoes are high in lycopene, an antioxidant, which may help protect your body's cells from damage, strengthen your immune system, and prevent some diseases.
